HEADLINE: Barona Casino Opens \$ 30 Million Gaming Complex With Over 715 New Las Vegas Slots and California's Highest Limit Table Games

BODY:

Grand Opening Marks the Introduction of World's First Fully-Integrated Voucher Technology Slots

SAN DIEGO, July 14 /PRNewswire/ -- The face of California and Nevada gaming will change dramatically today when Barona Casino officially opens its new \$ 30 million **gaming** complex, complete with new Las Vegas slot **machines** and table games. The grand opening marks Barona's introduction of Las Vegas " **coin** " slot machines, as well as Barona's exclusive new " **Voucher** In/ **Voucher** Out" coin-less slot technology, which industry watchers say will revolutionize the gaming industry.

"This is a proud moment in our history. We have truly come a long way. We used to always want what Las Vegas had and now the table has turned -- Las Vegas is watching us. Barona has always been a leader and today we are again at the forefront of a new era," said Clifford LaChappa, Chairman of the Barona Band of Mission Indians. "Barona is proud to be the first casino in the world to introduce a slot machine system that experts say will revolutionize the slot machine industry."

An exclusive group of world-renowned high-rollers, media, and gaming industry and business leaders will be among the first to experience the new 16,000 square foot gaming complex, designed by leading Las Vegas architect Bergman Walls & Youngblood. The complex features Barona's new Voucher technology, which allows casino guests to play all of their favorite slot machines without the nuisance of coins or the long waits associated with "cashing out" in order to play a machine made by a competitive slot maker.

In addition to the most popular Las Vegas slot machines, including Wheel of Fortune, Triple Play Poker, Jackpot Party and Quartermania, Barona's new gaming facility also features 20 new table games, including California's highest limit Blackjack (bets up to \$ 5,000), Pai Gow Poker, Caribbean Stud, Mini-Baccarat, Casino War, Let It Ride and Three-Card Poker.

"We have created the most advanced casino floor in the world, and in all my years in the gaming industry I've never seen anything like it," said Lee Skelley, long-time Las Vegas gaming expert and Assistant General Manager of

Casino Operations for Barona. "Barona has created a new era in gaming by bringing together the world's leading slot machine and gaming systems manufacturers, who have never before worked together or allowed their competitive machines to 'talk' to one another. Previously a customer would need to 'cash out' each time they wanted to play a new machine, and now they can simply take a voucher from machine to machine, without the hassle or the wait time."

"I've played in casinos from Las Vegas to Monte Carlo, and this is by far the most impressive casino floor in the world," said Max Rubin, world-renowned high-roller, card counter and best-selling author of *Comp City*. "Las Vegas is definitely watching, and I've heard a lot of buzz that Barona's new voucher technology will eventually phase out traditional coin slot machines."

Rubin, who has been featured in numerous national publications and appeared on 48 Hours, The Learning Channel and the Discovery Channel, is among the guests attending the grand opening. Rubin will play the new slots and review them for *Casino Player Magazine*, the industry's premier publication.

"What is truly remarkable to me is that Barona was able to accelerate the introduction of this technology by encouraging competitors to work together to develop a voucher system that is compatible with nearly a dozen different slot machine manufacturers," said Rubin.

For those guests who feel more comfortable with traditional coin-operated slots, Barona will still offer a variety of traditional coin operated slot machines. However, over 85% of the machines will use the new voucher technology. The convenient, dollar-sized vouchers fit comfortably in patrons' wallets, are compatible with multiple slot machine manufacturers, and can be used just like dollar bills. To begin play on the new machines, people simply insert cash or a voucher into the machine. When cashing out, players receive a printed voucher that can be used in any machine throughout the casino floor.

Barona Casino is one of the most successful casinos in California, with 115,000 square feet of alcohol-free gaming and hospitality space. The casino is owned and operated by the Barona Band of Mission Indians, which is recognized by the United States government as a sovereign government. Barona is in the process of a \$ 150 million expansion project, which will include a world-class, 18-hole championship golf course scheduled to open this summer, and a new casino and a resort hotel scheduled to break ground this year.

HEADLINE: Business unusual for those associated with video gambling in  
industry's final days

BYLINE: By DAN LEWERENZ, Associated Press Writer

DATELINE: SPARTANBURG, S.C.

BODY:

Loyd Trent already had packed up six of his 20 machines Thursday, two days before video gambling becomes illegal.

But Trent isn't in the video gambling business. He's in the cigarette business, stocking machines for Ace Vending, of Spartanburg.

Trent thought it was good business to put his machines in casinos - bars often asked for a percentage, while casino operators just wanted to know the machines would be stocked. But when the casinos close for good Saturday, it will hit Trent's wallet as well.

"That's where I've got most of my machines," Trent said. "When they close up, I've got to close up, pick up my machines."

Under pressure from anti-gambling groups, the Legislature last summer approved a referendum to decide the fate of video gambling. But the state Supreme Court in October struck down the referendum, leaving intact the part of the law that bans video gambling machines as of July 1.

All video gambling machines in the state must be turned off by midnight Friday. The State Law Enforcement Division has said it will give operators one week to get the machines out of the state.

Jimmy Gaskins owns the St. James Sports Bar and Grill in Goose Creek, a cool, dark neighborhood tavern that features raised round tables, a karaoke machine, a juke box and, in the rear corner, three video gambling machines. Gaskins and

HEADLINE: Alliance Gaming to Introduce Full Range of New Products to Gaming Industry

DATELINE: LAS VEGAS

BODY:

Sept. 21, 1998--Alliance Gaming Corp. (Nasdaq:ALLY) Monday announced its Bally Gaming and Systems business will introduce an array of new gaming products at the World Gaming Congress & Expo in Las Vegas on Sept. 23 through 25.

The first new unveiling will be an adaptation of television's longest-running prime-time game show, "Let's Make a Deal." Developed for Bally Gaming's 3-D video Game Magic platform, Let's Make a Deal incorporates full-motion video sequences and real voice-overs from the show's emcee, Monty Hall.

Hall will make a special appearance at the Bally Gaming booth on the second day of the expo to help introduce the new game.

"We expect operators and players to enjoy the entertaining experience of 'Let's Make a Deal,'" said Morry Goldstein, president and CEO of Alliance Gaming. "All the fun and zany features of the show have been thoughtfully carried over to this gaming product."

Let's Make a Deal is a five-reel, five-line video slot that will launch players into two different bonus features. In one bonus screen, players can choose to either keep their winnings, or trade for what's behind one of three doors.

In the other bonus screen, the player chooses from one of three audience characters in hopes of finding "Monty's Secret Envelope," containing a bonus prize. The game was jointly developed with Shuffle Master Inc., also a Las Vegas gaming supplier.

Bally will also demonstrate its "Thrillions" progressive jackpot system, the company's first offering for the multisite and intraproperty linked progressive market. This new system provides opportunities for casinos to link nickel, quarter, dollar, etc. machines to the same jackpot. Casinos also can uniquely theme the games on the system to their own brand.

Business Wire, September 21, 1998

In addition to this system, Bally will be demonstrating its new generation of cashless wagering systems, new graphic interfaces for casino management, and the GameTime system, which provides dynamic slot bonusing promotions.

Another new product to be debuted is "Bell Ringer," a new entrant in the second-feature bonus game market. By lining up the Bell Ringer symbol on the payline, players get a chance to "ring the bell" on the game's special carnival-style top box.

While madcap music is played, lights and sound converge to replicate the nostalgic midway-style "test-your-strength" machines, and award players a bonus prize.

Bally will demonstrate the Cash Cage bill-dispensing system, which already has gained considerable industry interest. This system has the potential to dramatically improve casino-customer satisfaction by reducing the number of coin-hopper fills and jackpots paid by attendants.

Cash Cage is a currency-dispensing system for gaming machines that pays out bills or casino-customized scrip to patrons. The scrip can be used in other gaming machines or cashed out at the casino's cage.

For its Pro-Series three-reel slot platform, Bally will be highlighting a new model that shows tremendous promise. "Roaring 20s" is a three-coin-maximum-bet game that features art-deco styling, ragtime sound, and a special re-spin feature that pays bonuses from 20-200 coins.

"Roaring 20s has performed better on our in-casino model test program than any of the industry's mechanical reel-spinning games," said Goldstein.

Alliance Gaming is a diversified gaming company with headquarters in Las Vegas. The company is engaged primarily in the design, manufacture and distribution of advanced gaming devices and systems worldwide, and is the nation's largest gaming-machine route operator and operates two regional casinos.

HEADLINE: Gaming Technology Poised for Great Leap, Atlantic City-Based  
Newsletter ReportsLEXIS-NEXIS Related Topicsno targeted Topics.

DATELINE: ATLANTIC CITY, N.J., Aug. 27

BODY:

New slot-machine technologies designed to reduce costs, minimize pilfering, streamline staffing and even create new forms of currency are wending their way through New Jersey's regulatory process -- and could soon wind up on the floors of Atlantic City casinos, according to Michael Pollock's Gaming Industry Observer, an award-winning newsletter that tracks trends that impact the gaming industry.

The newsletter's first "technology edition" focuses on certain key technologies with the potential to have a dramatic impact on casino floors throughout the nation. The systems that are analyzed in the "technology edition" include products from Spintek Gaming Technologies Inc. of Las Vegas, Bally Gaming Inc. of Las Vegas and Advanced Casino Systems Corp. of Egg Harbor Township, NJ.

Michael Pollock's Gaming Industry Observer has developed criteria to determine which technologies it will focus on: The technology should either meet a genuine market demand or offer significant cost savings, and it should have a realistic chance at securing the necessary regulatory approvals.

Bally Gaming has developed "Cash Cage," a "bill hopper" attached to slot machines that could dispense paper currency, which would be scrip issued by the casino. Spintek has developed "AccuSystem," which will improve slot management by electronically calibrating the number of coins in the hopper. A hopper is a device within each slot machine that dispenses coins into the player's tray. Advanced Casino Systems Corp. has already developed, and will soon be expanding and improving, a slot monitoring system that allows players to redeem and play their earned cash-back credits right at the slot machine.

Pollock, who served as spokesman for the New Jersey Casino Control Commission from 1991 to 1996, relies on his experience to analyze the potential regulatory concerns that face a new technology. He anticipates both the regulatory questions and the possible answers.

PR Newswire, August 27, 1998

Other companies whose products are discussed include: Casino Data Systems Inc. of Las Vegas and XpertX inc. of Reno.

Various new gaming technologies will be on display at the World Gaming Congress & Expo, which will be held at the Las Vegas Convention Center from Sept. 22 through Sept. 25. Michael Pollock's Gaming Industry Observer has been designated the official newsletter of the World Gaming Congress & Expo. For registration information, call 301-694-5243. (Conference attendees are entitled to 10 percent discounts on subscriptions to Michael Pollock's Gaming Industry Observer.)

Michael Pollock's Gaming Industry Observer is also working in partnership with the New Jersey Technology Council to sponsor a half-day session that will discuss various trends in technology that will impact the gaming industry. That session will be held Oct. 21 at the Tropicana in Atlantic City. For more information, call 609-452-1010.

In 1996, Michael Pollock's Gaming Industry Observer was awarded first prize in the Interpretive/Analytical Reporting category at the 17th Annual Newsletter Publishers Foundation Awards.

In addition to having served as chief spokesman for the New Jersey Casino Control Commission, Pollock is the former editorial page editor for The Press of Atlantic City and is the author of the 1987 book, "Hostage to Fortune: Atlantic City and Casino Gambling," published by the Center for Analysis of Public Issues in Princeton, NJ. He has won 17 journalism awards in his career.

He is founder and organizing sponsor of the highly successful Rutgers University Gaming Symposium, which was held in Atlantic City in 1997 and 1998, and is expected to grow significantly in 1999.

For more information on Michael Pollock's Gaming Industry Observer, call 609-272-7903 or via e-mail to [Pollockfpressplus.com](mailto:Pollockfpressplus.com).

HEADLINE: New BART ticket device wins praise;

Concord first station to get friendlier ATM-like machine

SOURCE: Chronicle Staff Writer

BYLINE: Michael Cabanatuan

BODY:  
BART's balky ticket-vending machines and fare gates -- long the bane of transit-riding commuters and cranky station agents -- are about to be replaced with newfangled devices that seem to actually work.

That's encouraging news for BART riders, who have had to struggle for years with machines that routinely reject perfectly crisp currency, jam and shut down just as a train is arriving, or are so confusing they nearly require a manual and a personal instructor to operate.

BART officials will unveil the new ticket machines Tuesday morning during a ceremony at the Concord Station. Crews will soon start installing the new equipment at every station, replacing all of the existing ticket machines, some of which are 30 years old. The downside for BART riders is that it will take two years for the new equipment to arrive at every station.

But one of the machines is already in use. Workers from BART and Cubic Corp., the San Diego firm that built the machines, have been testing the equipment at Concord for several weeks -- and the public has been using it, while BART testers observed, for the past week or so.

Regular, occasional and first-time BART riders seem to like the new ticket machines, which resemble automatic teller machines with color screens that display step-by-step instructions and choices.

"It's good," said Jagruti Paleja of Concord. "It's more like an ATM, and it gives you more options."

A rigorous test by The Chronicle found that the machine stood up to most of the typical transit rider abuse it is likely to face. Several times last week, a reporter put the machine through its paces, buying new tickets, increasing the value of existing tickets and paying with all varieties of coins and bills. Dollar bills were wadded up, then smoothed out and inserted into the machine. It

accepted the crumpled currency without hesitation.

BART's paper tickets, which often jam ticket machines when creased, were folded into triangles and otherwise spindled, folded and mutilated, then flattened out. Again, the machine came through, reeling the damaged ticket in, reading it correctly and displaying the proper directions for increasing its value.

The machine also seemed easy to use -- even for folks who had to be talked into trying the new device by BART employees instead of using the old, familiar machines.

"I like it much better than the old machines," said Sheila Thompson of Oakley. "It gives much better instructions. This one is a lot simpler."

The new machines -- the fourth generation of BART ticket-vending machines -- look nothing like the old, tall stainless steel cabinets with multiple buttons, slots and digital displays.

*Blue system*

The new machines feature a color video screen on the left, with four buttons on **either** side, and **coin slots** and a bill processor on the right. A single **ticket slot** -- for inserting old tickets and receiving new tickets -- sits beneath the screen. Below that is a change and receipt return. At the push of a button, the machine will also give audio instructions.

When customers approach the machines, they are greeted by a message on the screen reading "Welcome to BART" and asking them to insert bills, coins or an old ticket. Soon, perhaps by year's end, the machines will also accept credit or ATM cards.

Once money or an old ticket is inserted, the screen gives the customer options, with selections lining up alongside the buttons. Among the selections is a new choice -- multiple tickets. The new feature allows BART riders to buy as many as five tickets of the same value in a single transaction -- something that should shorten lines and make it easier for groups traveling together.

Frequent breakdowns of BART's ticket-buying, change and add-fare machines and fare gates have become one of the system's biggest problems, and fluorescent orange "out of order" signs have become commonplace.

Station agents spend much of their time, especially during commute hours, fishing jammed tickets out of fare gates and trying to repair ticket machines. The malfunctions can also be costly because station agents throw open the gates if too many machines are out of order.

BART ordered the new fare-collection equipment at a cost of \$99.5 million as part of the transit agency's 10-year, \$1.2 billion systemwide renovation program, which is 90 percent complete. The program, funded largely with fare increases in 1995, 1996 and 1997, focused on rehabilitating the system's stations and rebuilding its 439 original railcars.

BART has already installed new fare gates at Concord and Fruitvale stations and is working on Oakland's 19th Street Station. New add-fare machines, which also sport an ATM look, are still being tested but are expected to go public in a couple of weeks.

The fare gates look and work the same as the existing gates with one exception -- a small rectangular color screen that displays ticket values or directions. The real difference is inside, where the machinery that processes the ticket and spits it back out has fewer moving parts and is easier for station agents to get into when problems arise.

Station agents at Concord said the new fare gates have worked smoothly, all but eliminating problems with jammed tickets and closed gates.

"Station agents tell me that if the (ticket machines) work half as well as the fare gates, they'll be ecstatic," said David Hulse, a veteran BART station agent, now retired, who helped with the design and installation of the new machines.

BART riders, he's confident, will be just as enthusiastic.

HEADLINE: Detroit casinos roll over to cashless slots

DATeline: DETROIT

BODY:

The clink of cash winnings at slot machines is moving closer to becoming a thing of the past at the city's casinos.

Greektown Casino is hoping to convert a fifth of its slot machines to cashless by the end of the year, and Casino Windsor is waiting approval from Ontario gaming regulators to introduce cashless slots on a trial basis as early as this spring.

"Cashless is the hottest ticket in town," Glen Sawhill, Casino Windsor's slot operations vice-president told The Detroit News for a Sunday story.

The changes parallel what is expected to happen nationally. A 2001 Goldman Sachs survey of 71 U.S. slot managers found that only 8 percent of casinos had cashless machines, but nearly 50 percent would have at least some in a year.

In a way, a more accurate description of most "cashless" systems is "cash optional." With Greektown's system, for example, gamblers can initially insert bills or coins into the slots. But the slots can be programmed to dispense a guest's winnings either in the form of a paper ticket, or in the traditional coins.

Gamblers collect winnings from an ATM-like device.

Coinless slots don't jam as often and don't run out of coins.

Until recently, the cashless movement had met with only scattered success. But the technology won an unofficial casino seal of approval last spring when Park Place Entertainment, which manages Casino Windsor and owns or manages 28 other gambling halls, announced it would install 15,000 coinless slots.

January 6, 2002, Sunday, BC cycle

Some casino customers are wary of the change.

"Psychologically, people like to hear the noise when the coin hits that pan," said Paul Rogissart of Plymouth.

The preamble of claim 9 states what needs to be found, "In a gaming system including at least one gaming machine arranged to accept both bill monies and cash vouchers and store accepted bill monies and cash vouchers with one another, a soft count system for reconciling cash vouchers accepted by said at least one gaming machine".

That is, I am looking for a gaming or gambling machine that accepts both bill monies and paper cash vouchers such that the user can then begin using the machine for gambling. The system then compares the cash vouchers in the gaming/gambling machine with the record of cash vouchers that have been given out to users. The cash voucher is a form of credit that is given to users on paper tickets. The paper tickets can then be used in gambling machines.

Claim 9, 23, and 24 are below which are the key claims that I am looking for.

Thank you.

Claim 9. In a gaming system including at least one gaming machine arranged to accept both bill monies and cash vouchers and store accepted bill monies and cash vouchers with one another, a soft count system for reconciling cash vouchers accepted by said at least one gaming machine with cash vouchers retrieved by said at least one gaming machine comprising:

**METHOD AND SYSTEM FOR ISSUING AND USING GAMING MACHINE RECEIPTS**

Inventor(s):

ROWE Rick ...

Main International Patent Class: G06F-017/00

Fulltext Availability:

Detailed Description

Claims

English Abstract

The invention comprises a **gaming** system including at least one **gaming** machine arranged to accept and print receipts. In one embodiment of a method, a player playing a **gaming** machine is issued a receipt which represents credit or value belonging to the player, and...

...at a first location, such as a parking garage, accepting the first receipt at a **gaming** machine, issuing a second receipt at the **gaming** machine and then accepting the second receipt at another location, such as a parking garage exit. In this method, the **gaming** machine serves as a validation mechanism to a player activity or event.

Detailed Description

METHOD AND SYSTEM FOR ISSUING AND USING

**GAMING MACHINE RECEIPTS**

FIELD OF THE INVENTION

The present invention relates to **gaming** machines, and more particularly, a **gaming** machine capable of issuing a receipt or **ticket**

#### BACKGROUND OF THE INVENTION

Currently, a variety of tasks related to the operation of a **gaming** machine including associated systems and a variety of the services offered to game players, are disjunctive. For example, a **gaming** machine may be arranged to accept credit cards, coins or cash as a payment form  
...

...player for entitlement to place a bet and play a game. To facilitate these functions, **gaming** machines may be linked to a first network which is arranged to carry out a credit card authorization function.

A **gaming** machine may also include a card reader for reading information from a player tracking card and for tracking player play and rewarding awards for play. For this purpose, **gaming** machines may be linked to a second, entirely different player tracking network. This network may...

...take their player tracking card to the reward booth after they have stopped playing a **gaming** machine, provide their player tracking card as identification, and then be awarded a "comp."  
The...

...a jack into which may be plugged diagnostic equipment for receiving information from a **gaming** controller of the machine. In order to receive information regarding the operation of the **gaming** machine, however, a technician must travel to the machine with the necessary diagnostic equipment. Diagnosis...

...a screen of the diagnostic equipment.

It is desirable to reduce the complexity of the, **gaming** machine, as such both reduces its cost of manufacture and cost of operation. At the same time, it is desirable to make the **gaming** machine more versatile, offering the player a greater number of services.

#### SUMMARY OF THE INVENTION

The present invention comprises a **gaming** system and a method of using and issuing receipts.

In one embodiment, the **gaming** system includes at least one **gaming** machine. The **gaming** machine is adapted to accept credit from a player, present a game for play to...

...winning in the event a winning event is achieved by play of the game. The **gaming** machine is arranged to print receipts.

In one embodiment of a method, the receipt issued by the **gaming** machine is representative of value issued belonging to the player, such as credits provided to and won on the **gaming** machine. In addition, the receipt includes secondary information. The secondary information in one embodiment comprises...

...another embodiment, the secondary information is unrelated to game play and comprises horoscope, lucky number or other information.

In another embodiment of the invention, the **gaming** system includes at least one first location at which a first receipt may be issued. The first receipt may be accepted by a **gaming** machine. The **gaming** machine may then issue a second receipt, the second receipt usable at a second location...

...a method, a first receipt is issued at a parking garage entrance or similar location.

A player presents the first receipt at a gaming machine. In response, the **gaming** machine issues a second receipt. The player may utilize the second receipt at a second...

issuing a second receipt at said **gaming** machine to said player;  
accepting said second receipt at a second location.

2 The method...

...with Claim 1 including the step of verifying game play by said player at  
said **gaming** machine and issuing said second receipt upon verification  
of said game play.

7 A **gaming** system comprising:

at least one first device located remotely from said **gaming** machine  
adapted to issue a  
first receipt;

at least one **gaming** machine adapted to accept credit from a player,  
present a game for play by a...

...accept said second receipt; and

at least one host with which said at least  
one first device and said at least one se

*removed*

at least  
id...

...regarding said first receipt, confirm s  
by said at least one **gaming** machine, st  
second receipt, and confirm said second r  
least one second device. 8 . The **gaming**  
7 wherein said host is configured to gene

*unnecessary*

accepted  
g said  
said at  
th Claim

*pages 3-9*

...said at least one first device for use in issuing said first receipt. 9  
. The **gaming** system in accordance with Claim 7 wherein said at least  
one first device comprises a **ticket** issuing device at a parking garage  
entrance.

10 The **gaming** system in accordance with Claim 9 wherein said at least  
one second device comprises a **ticket** accepting device at a parking  
garage exit.

11 The **gaming** system in accordance with Claim 7 including at least one  
communication link linking said at least one first device, said at least  
one second device and said at least one **gaming** machine with said host.

12 A method of presenting a game comprising:

providing at least one **gaming** machine, said **gaming** machine arranged  
to present at least

one game for play by a player;

accepting a...

...for use in playing a game of chance presented at other than an  
electronically operated **gaming** machine.

Detailed Description

METHOD AND APPARATUS FOR FACILITATING AND  
MONITORING MONETARY TRANSACTIONS AND REWARDS

IN A **GAMING** ENVIRONMENT

FIELD OF THE INVENTION

The present invention relates to methods and devices for providing...

...including tracking amounts lost by a player.

BACKGROUND OF THE INVENTION

Traditionally, the play of **casino** games and other games of chance was  
based on the **wagering** of actual money, such as coins and currency.  
Coins and currency have traditionally been used directly as bets in table  
games such as **poker** and **blackjack**. Alternatively, the coins and  
currency are exchanged for chips which have a representative monetary  
value.

As mechanical games of chance were developed, such as the well-known  
**slot** machine, coins were used to activate the machines. Later, bill  
validators were provided which allowed players to avoid the need to

convert their currency to coins before playing a **gaming** machine. Outside of the gaming industry, the consumers were provided with a large variety of **gaming** industry has come to embrace some of this technology and provide greater flexibility to consumers. In...

...this technology has focused upon interfacing existing external systems, such as banking systems, with internal **casino** accounting. For example, U.S. Patent No. 5,457,306 discloses the use of credit cards in association with **gaming** machines.

The prior art has not addressed, at least from the consumer or player's including expenditures and winnings.

In some jurisdictions, a **casino** or other entity providing **gaming** services is not permitted to allow a patron or player to continue game play if...

...amount of money in a predetermined period of time. It is thus important for a **casino** to be able to track the wins and losses of a player to ensure compliance with these regulations.

Several problems frustrate the ability of a player and a **casino** to monitor or track player wins and losses. In most game play scenarios, a player...track the total amounts wagered and paid out for determining total loss (or win). A **casino** may attempt to track a player's play with a player tracking system where a **gaming** machine provides coin in and coin out data. In many instances, however, a player may...

...the system. A player not using the system may lose hundreds of dollars without the **casino** being aware of the loss, in violation of the regulations.

**Casinos** are continually looking for new ways to entice existing players to play games, and draw in new players. In some instances, **casinos** track player game play and, if the player's level of play reaches a certain...

...player independent of the any winnings the player receives from game play. For example, the **casino** may offer the player a free night's stay at a hotel associated with the **casino**. This system offers little player interaction, however, with the discretion of awards left to the **casino**.

A system and method for monitoring player financial transactions, including tracking of player loss, is...

...It is also desirable to provide an improved system for providing player rewards in a **gaming** environment.

#### SUMMARY OF THE INVENTION

The present invention comprises methods and apparatus for tracking, effectuating and/or monitoring financial and reward transactions in a **casino** or **gaming** environment. One embodiment of the invention comprises a method and system for monitoring player ...embodiment of the invention comprises a financial monitoring system. The system includes one or more **gaming** machines or devices. The system also includes a financial system host. The financial system host...devices are provided. The input devices may be associated with or be independent of the **gaming** devices. Each input device is linked to the financial host for receiving player identification information...

...a player card, such as a special player account or tracking card issued by a **casino**, or a player's credit or ATM card.

One or more embodiments ...of a player's deposits to their account and the award of winnings from a **gaming** machine. In one embodiment, information regarding a player's deposits or credits are stored in...and

50 A method of awarding a player an award in a **gaming** environment, said award ...elements comprise points.

. A method of enticing a player to play a game at a **casino** comprising:  
establishing an account;  
associating a plurality of credit with the account;  
generating a media...

...to utilize said media to establish entitlement to play one or more games at said **casino** for free.

Patent Details:

Patent No	Kind	Lan Pg	Main IPC	Filing Notes
JP 9117568	A	8	A63F-007/02	

Game apparatus e.g. slot machine - ...

...issues calculation label printed with number of existing tokens based on data corresponding to number of tokens signal sent and specified to slot machine which is distinguished by operating specific button

...Abstract (Basic): The game apparatus has a token loan machine (B) connected to a slot machine (A1). A certain amount of money is received by the token loan machine which processes and outputs a money amount signal to be converted by a transducer to a signal corresponding to the number of loaned tokens .

...

...When a player presses a specific button on the slot machine side to specify what slot machine should receive the number of tokens signal output from the transducer, the same signal is likewise specified. A calculated label is then issued by printing the present number of tokens based on the corresponding data given to the slot machine .

...

...ADVANTAGE - Easily assembles and connects slot machine and token loan machine by using simple electrical connection. Reduces installation and management costs by enabling money processing and calculated label issuing in one token loan machine. Prevents distribution problem in providing number of tokens to players. Enables player to receive calculated label on which remaining credit for number of tokens are printed . Plays game without actually using live token .

...Abstract (Equivalent): A game play media lending **machine** (20) being placed in a **gaming** house containing a **gaming machine** (11) into which game play media are loaded for game execution and a game play media **counter** (130) for counting game play media and issuing a recording medium (C) on which the number of the game play media is recorded, for lending game play media **used** at the **gaming machine** (11), said game play media lending machine comprising: a recording medium reader (25) for reading...

...from outside; a controller (40) having a memory (28a), an operation section (28), and an **output** section (29) for **outputting** the operation result to the outside; a display (30) for displaying amount information **output** from said controller (40); an amount selection switch (31) for accepting specification of an amount of **money** for a player to borrow game play media and **outputting** information indicating the amount of **money**; and a mechanism (35) for dispensing as many game play media as the number indicated...

...said controller (40); characterised in that said operation section (28) comprises: first operation means for **calculating**, based on the number of game play media read from the recording medium (C) and a predetermined lending unit price of a game play medium, a lending equivalent amount of **money** required to **receive** dispensing of as many game play media as the number read from the recording medium (C) from said game play media lending machine (20); second operation means for **calculating** a conversion amount that can be **used** by a player to borrow game play media based on the **calculated** lending equivalent amount and an exchange rate preset to collect a game play charge in...

...conversion amount being an input amount and the amount indicated by the amount specification information **output** from said amount selection switch (31), being a **used** amount; fourth operation means for **calculating** a difference between the lending equivalent amount and the conversion amount; means for causing said display to display an input amount before the remaining amount is **calculated** and the remaining amount after it is **calculated**; and dispensing control means for **outputting** a dispensing instruction to said dispensing mechanism (34) based on the amount specification information **output** from said amount selection switch (31), said **output** section (29) **outputting** the **calculated** difference as information representing the collected charge

...Abstract (Equivalent): A charge collection method in a **gaming** house

containing a **gaming machine** into which game play media are loaded for game execution, a game play media lending machine for lending game play media **used** at the **gaming machine**, and a game play media **counter** for counting game play media **dispensed** at the **gaming machine** and issuing a recording medium on which the number of the game play media is...

Apparatus for progressive jackpot gaming .

...ABSTRACT is progressive in that unwon amounts of the jackpot carry over to the next hand. **Apparatus** is provided to receive each **gaming** token wagered for the jackpot component, to increment the jackpot meter which displays the jackpot...

...SPECIFICATION B1

The present invention generally **relates** to **casino** or cardroom gaming involving a progressive jackpot. More particularly, it relates to a progressive jackpot...

...in gaming establishments to provide a progressive jackpot component in connection with electronic or mechanical **gaming devices**, such as **slot machines**, video **poker machines** or **keno machines**. Typically a **plurality** or "bank" of **machines** are **electronically** interconnected to a common progressive jackpot **meter**. As **gaming** tokens are fed into each **machine**, the amount **shown** on the jackpot meter progresses **incrementally** until some lucky player lines up the winning combination, such as three or four 7's on the same row of a **slot machine**. In video **poker**, a Royal Flush normally **wins** the jackpot, although in some variations, a player must achieve a Royal Flush in an exact order, such as...

...US-A-4,837,728, filing date January 25, 1984 and published on June 6, 1989. This document shows **devices** which were in use in USA casinos before the priority date of the present application.

US-A-1...

- ...useful in providing the progressive jackpot component to casino or cardroom table games such as **poker** or **TwentyOne** . To this end the present invention provides an apparatus with the features of claim 1...
- ...of making an additional wager that becomes part of, and makes the player eligible to **win** , the **progressive** jackpot. If the player's Twenty-One hand comprises a particular, predetermined arrangement of cards...
- ...to any other casino or cardroom game such as Draw Poker, Stud Poker, Lo-Ball **Poker** or Caribbean Stud" **Poker** .  
The **apparatus** used to practice the present invention comprises a gaming table, such as those used for...the present invention, the progressive jackpot would be increased between 93% to 97% of the **amount** of each gaming **token** being wagered, the **balance** representing the house's share of the amount wagered for **providing** the progressive jackpot component of the game.  
When each player has had a reasonable opportunity...present invention. Each playing location has a coin a acceptor 210 into which a player **places** a **gaming** token in order to be eligible for the progressive jackpot amount. When all players have...
- ...progressive output control 230 which in turn activates three separate devices. An integrated circuit timer **is** energized which **causes** an indicator light 250 to be illuminated at the location on the coin acceptor in...
- ...progressive jackpot control 230 also activates an odometer-type counter 255 which increments by one **unit** for each **gaming** token wagered through the coin acceptor. This allows the gaming establishment to keep an accurate...
- ...CLAIMS table (10) including a plurality of player locations (12) at which a player receives playing **cards** from a dealer, said **apparatus** comprising:
  - a) means associated with each player location for the player to insert a gaming...
- ...for decrementing the amount shown on the progressive jackpot meter (80, 60) by the amount **won** by a player **if** the player achieves a predetermined arrangement of the playing cards.
  - 2. Apparatus according to claim...
- ...an indicator signal means (22) associated with each playing location (12) for indicating that the **gaming** token has been inserted.
  - 3. **Apparatus** according to claim 1 or 2, further including lockout switch means (55) for preventing late inserting of the **gaming** token.
  - 4. **Apparatus** according to anyone of the preceding claims, further including reset switch means (50) for resetting...

**Title:** A gambling machine  
**Author(s):** Fuente, J.  
**Journal:** Revista Espanola de Electronica vol.26, no.301 p.30-5  
**Publication Date:** Dec. 1979 **Country of Publication:** Spain  
**CODEN:** RVEEBT **ISSN:** 0482-6396  
**Language:** Spanish  
**Subfile:** B

**Title:** A gambling machine  
...Abstract: push buttons instead of a lever. The first, or 'Start', button sets the three random **counters** in operation for some seconds. The three other buttons each control one random **counter** to give a player a chance of **equalising** his three numbers. The circuit required comprises a variable speed clock pulse generator (an IC...

... three NAND gates in a quadrupole IC 7400, the positive outputs from which control three **counters**, type IC 7440, each of which operates an IC 7441 to decode the BCD pulses into decimal digits. After any of the four switches is released the **counters** continue to operate for a period determined by their own RC networks. Besides giving a...
